YOU ARE INVITED TO A FREE SEMINAR AND WORKSHOP

THE LIVING LAWN – A LAWN FOR LIVING SIMPLE STEPS TO ORGANIC LAWN CARE

FREE SEMINAR
at ATLANTIC DESIGN CENTER (in the Eldredge building), 627 US RT. 1, York, Maine
Saturday, March 14, 2015 — 10:30-11:30 AM

Jay Feldman, Director of Beyond Pesticides, Washington DC, and Chip Osborne, Owner of Osborne Organics, Marblehead, MA, will be discussing compelling reasons why we should consider a natural approach to lawn care. Public health, storm-water runoff, and water quality issues are all reasons why we should reduce our dependence on synthetic and chemical products to grow our lawns and gardens.

Their approach will be to share the mission of pesticide reduction and elimination through “Awareness Through Education” programs.

FREE WORKSHOP
at OGUNQUIT FIRE STATION, 2nd Floor, 15 School Street, Ogunquit, Maine
Saturday, March 14, 2015 — 1:00 PM-4:30 PM
sponsored by Ogunquit Conservation Committee.

Chip Osborne will take a 3-step Systems Approach to Natural Turf Management and discuss:
1.) Basic understanding of soil biology.
2.) The proper use of natural, organic products as indicated by soil testing.
3.) Specific and sound cultural practices.

This will be explained so that the do-it-yourselfer will be able to care for the lawn or inform his landscape contractor. It will also be a great introduction to natural lawn care for the Landscape Contractor.
